401-766-3100 (office) & 401-741-2656 (cell)

Mill City Construction, Inc. is a small business.

Mill City Construction, Inc. was incorporated in January of 1993. Prior to that we were in business as Construction Concepts, as a union company for over 20 years. We have been working with the USPS for over 35 years on a variety of projects in size & scope throughout the New England area. We have a core group of office personnel for the bidding process, billing process, & project management of our projects. The rest of our team is in the field for project supervision & carpentry work in which we self-perform. We perform work for a variety of other clients than the USPS including, but not limited to multiple state entities, DCAMM, local cities & towns, colleges & universities, the diocese, Blackstone Valley Prep schools, etc.

Please respond with any questions at all. We look forward to working with you on these projects & thank you for the opportunity.

Respectfully Submitted,

Stephen Traghella, LEED AP  
Project Manager
